

Earn Lasting Relationships

WITH THE ALL IN ONE LOAN

How a mortgage can free up funds for reinvesting in real estate.

Almost all of your clients finance their home or investment property purchase with a mortgage. Mortgage financing makes a real estate purchase possible, but it also quickly becomes the homeowner's biggest expense.

With a traditional mortgage, the homeowner's money gets tied up in the mortgage payment and they cannot easily withdraw equity unless they refinance. **The All In One Loan™ changes the way the mortgage works, giving the buyer access to home equity, and enabling them to invest elsewhere.**

Use the *All In One Loan* to earn new business and create new opportunities for existing clients.
